The written contents of the Press Release are attached to this Letter of Authorization in two possible drafts, and aesthetic and formatting adjustments can be made by ICICB Group and its subsidiaries. Furthermore, if significant adjustments are necessary, they can be requested and authorized per e-mail sent to and from allysson@firegecko.studio.

FireGecko Ltd

Allysson Silva – Director

PRESS RELEASE DRAFT 1

UAE Technological Investment firm, ICICB, collaborates with innovative game development company Fire Gecko to launch Space Mavericks

Emerging as one of the fastest-growing multinational corporations, ICICB, has been tenacious in bringing its mission of leading the digital transformation era into reality. Serving a variety of industries from digital finance, jewels, commercial real estate and more, the tech-giant has a proven track record of creating waves of revolutionary new businesses and propositions with rigorous determination. The innovative investment corporation, ICICB, has recently shown their purpose to put a remarkable spin on the burgeoning technology in the gaming sector through the collaboration with gaming development company, FireGecko.

The significant progress of blockchain technology in recent years has evidenced that any financial service can be equipped on the blockchain model while maintaining efficiency, transparency, and cost-effectiveness. This cemented the astounding potential of non-fungible tokens, which have shot up in popularity in recent months. Newer virtual worlds and NFTs have already had a beneficial impact on vast industries like entertainment and retailing. As a result of the growth, the Dubai-based tech-giant, ICICB, is taking on board this trend with a global twist as they reveal their recent collaboration with premium game developer FireGecko to launch a real-time multiplayer game which will include intriguing space features that distinguishes it from rivals.

The highly-anticipated game that is set to launch is called 'Space Mavericks'. It is a real-time multiplayer game that recreates the popular vintage artillery style of aiming and shooting by adjusting angles and power. It is a hybrid between free-to-play and play-to-earn, which has been labeled to be a 'future-giant' gaming model by blockchain analysts. It is a game that will include the best of both worlds through showcasing features from the combination of classic games such as Angry Birds and MOBAs such as League of Legends. FireGecko have successfully incorporated popular game modes such as battle royals, competitive tournaments and taking on video-game bosses in an attempt to grasp the attention of the passionate industry. Unlike prior artillery games, Space Mavericks will be played in real-time and will require players to acquire skills in order to earn through a rank system which has proved to be a success within the gaming industry. Moreover, there will be a unique 10,000 space collection for every player's 'commanders' from a spaceship generator. These will be available in the marketplace where players can trade their assets, get new items and in-game linked NFTs. Finding and upgrading rare items and NFTs will enable players to profit further and act as an incentive for players to trade the in-game token SMC. Players can profit by winning the battles, defeating bosses, selling the NFT spaceships on the marketplace, or simply inviting others to play the game. There are unlimited ways players can use SMC in-game to increase their power or further customize their spaceship.

The new game created by the ICICB collaboration is aimed at mid-core players ages 18 - 40 interested in multiplayer arena battles, artillery games, and crypto games. The game will be cross-platform with Initial platforms being macOS, Windows, Android, and iOS. A modern iOS/Android phone or a regular PC/Laptop with a stable internet connection is enough to play Space Mavericks. Space Mavericks does not require high-end hardware nor any investment to start. Players can play for free until they love the game and want to enjoy all the additional features and challenges the game can offer.

The ingenious R&D team behind the game spent the past couple of years analyzing the market and latest games. ICICB and FireGecko are confident that Space Mavericks is a unique product in the entire NFT gaming market with its Free-to-Play and Play-to-Earn mechanics. Furthermore, the companies have outlined the simplicity in terms of utility and usage in other NFT games, whereas Space Mavericks aims to

be vibrant and encompass deep gameplay with regularly updated features.

PRESS RELEASE DRAFT 2

Following a successful release of its highly anticipated blockchain network, ICICB unveils the launch of 'Space Maverick' in collaboration with Fire Gecko.

Dubai, United Arab Emirates

Following a successful release of its highly anticipated blockchain network, ICICB unveils the launch of 'Space Maverick' in collaboration with a game development company.

ICICB has emerged as one of the world's fastest-growing holding companies in recent years due to its consistency in the successful delivery of revolutionary projects that exceed expectations. With the growing popularity of blockchain and newer virtual worlds, the ICICB team has worked diligently to achieve its goal of becoming the world's most dynamic technology firm. The tech giant has a proven track record of creating waves of revolutionary new businesses and propositions with rigorous determination, representing a variety of industries including digital finance, jewels, commercial real estate, and more. In order to accelerate the evolution of digital gaming, the multinational corporation with a presence in twenty-six countries announced its intention to collaborate with FireGecko on the release of a multiplayer artillery game for cross platform applications.

The impending launch of the game titled Space Maverick is a real-time multiplayer game that recreates the classic style of aiming and shooting with a bit more challenge because the game is set in space and gravity plays a big part in it. The one-of-a-kind game is the result of their thorough research and development in understanding the intricacies of gaming. It offers unmatched features that elevate it from other gaming rivals. As a free-to-play and play-to-earn hybrid, players can play for free to start. This game will feature the best of both worlds by combining elements from classic games like Angry Birds and MOBAs, such as League of Legends, to attract players between 18 and 40 who are interested in multiplayer arena battles, artillery games, and crypto games. In addition to that, Space Mavericks will be played in realtime, and players will be required to develop skills to earn rewards through a ranking system that has been extremely successful within the gaming industry. From a spaceship generator, players will have access to a unique 10,000 space collection for each of their 'commanders'. The marketplace will allow the player to discover rare assets, trade gaming items and collectibles, and generate NFTs.

The inventive development team has disclosed that Space Mavericks does not require high-end hardware or any investment to get started. Initially, players can try the game for free to see if they enjoy it and want to take advantage of all the extra features and challenges it offers.

Moreover, the players can earn money by winning battles, defeating bosses, selling the NFT spaceships on the market, or simply inviting others to play the game.

To ensure the project is a success, the team has spent the past few years analyzing the market and latest games. They are certain that Space Mavericks will be a unique product in the entire NFT gaming market with its Free-to-Play and Earn-to-Play mechanics. According to the company, Space Mavericks has a vibrant and deep game experience with constantly updated features that will satisfy every gamer and blockchain enthusiast.
